LIBRARY TAKES ON NEW, DRAMATIC LOOK

As the temperature climbs, the flowers burst forth with exotic colors, and the trees change to myriad shades of green, we are about to see a dramatic transformation of the exterior of the Library.

Approximately nine months ago the Board of Trustees began a discussion about changing the appearance of the landscaping around the building. During the last week of February the first phase of that change was completed. Robert Kelly, preeminent arborist and owner/operator of Nature's Way, completed the trimming of the hawthorne, cottonwood, oak, and locust trees. Phase two began with the hiring of Joe Miller from Sam Miller and Son Landscape Company to execute the landscape design. The culmination of his work took place on March 14 when he presented the Board with his concept for the landscaping of the property: an integrated design using natural local plantings that provide low maintenance but aesthetic beauty in a park-like setting. In the process of designing the dramatic changes, Miller was also directed to correct the drainage problem that has existed around the perimeter of the building for a number of years. The next step is to let the project out for bids from local landscaping companies.

Once a landscaper has been hired to execute the landscape design, we will see changes occurring very quickly. A comprehensive regrading of the property will take place, and all drainage conduit will be placed underground and redirected away from the building. Planting beds will be laid out, shrubs and flowers planted, and mulch distributed throughout the beds. The Library sign will be replaced. The sunken area at the north end of the building will have a two-tiered

retaining wall installed with plantings on both levels and stairway built to allow access for maintenance of the area. The cement block walkway and area surrounding the flagpole will be redesigned to incorporate both into a park-like setting that will highlight the flagpole and create a space for sitting and relaxing. The driveway that skirts the west side of the property will have some type of pavers added to the curve at the northwest corner so that cars do not drive on the lawn. With a new sign and plantings at the street level, customers entering the Library drive will be directed to the entrance where the plantings will complement those near the sign and along the east side of the Library. The front of the Library will take on a new look with extensive planting of shrubs and flowers in wide beds.

The final phase of this huge project will be the screening along the eastern edge of the property between the parking lot and the new senior housing complex. The Board will complete that when the housing project has been finished, but it will be as beautiful as the rest of the Library landscaping project. If everything goes according to schedule, the majority of the work will be finished by the end of May, and Library customers will see a dramatic transformation that will make the Library one of the most distinctive and attractive public buildings in the area.

LIBRARY RECEIVES GRANT TO PROVIDE ADDITIONAL SERVICES FOR SPANISH-SPEAKING PATRONS

¿Habla Espanol? Thanks to the Hispanic Services Initiative, a new program at the Dundee Township Public Library, Spanish-speaking patrons can now communicate more easily with Library staff. The program is underwritten by a grant from the North Suburban Library Foundation and provides funding for two bilingual Library assistants.

Over the last few years there has been a significant increase in Library use by Spanish-speaking patrons. The addition of the bilingual assistants will greatly increase the staff's ability to offer excellent service to patrons with limited English skills.

The three assistants are both students at Dundee-Crown High School. They were recruited and trained in job readiness through the Boys and Girls Club of Dundee Township. The new Library assistants will be working mainly in the evening hours when there is the greatest need. They will aid patrons in filling out forms, understanding Library procedures and benefits and navigating computer resources, including the automated card catalog. They will also be assisting staff in translating Library brochures and flyers.

In addition to the bilingual staff positions, the program includes a series of Spanish and bilingual family story programs and informative life skills programs for adults in Spanish.

The adult programs will be presented at the Library by personnel from Centro de Información, a not-for-profit social service agency serving the needs of Hispanic families in Kane County. The programs will include parenting, immigration and health concerns.

The \$11,357.48 grant is part of the North Suburban Library Foundation Tolerance Initiative Grant Program. The purpose of the program is to promote diversity and a sense of community. The Library staff is excited about the possibilities presented by this grant and the opportunity to work closely on the project in partnership with the Boys and Girls Club of Dundee Township, Centro de Información and the North Suburban Library Foundation.
