Volume 4 Number 1

♦ from the Director

What a great summer! We had a record breaking 935 children participate in the Children's Summer Reading Program. Our new Adult Summer Reading Program had an impressive 109 participants!

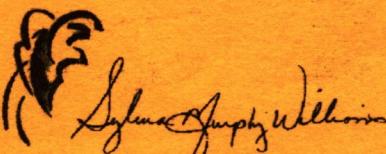

We started our new Prize Pick Collection (See page 2 for details), added a new public access computer for word processing and enjoyed some entertaining and interesting programs.

As we begin this new school year I encourage all of our students in the district to take advantage of our reference services and materials. This Fall

we are planning to add three new work stations that will give you access to several informative CD ROM products.

Our Adult and Children's Departments and the Friends of the Library have some wonderful programs planned for the season. The Friends of the Library will have their first meeting September 17 at 7:30 PM in the Library Board Room.

As you watch the leaves change when Summer turns into Fall don't forget to stop by the Library. We're changing, too!

THE LIBRARY CAN HELP STUDENTS MAKE THE GRADE

The school year has started and students are being assigned projects that require research into a multitude of topics. The Library can be the solution to research problems if you know where to look.

Inspiration for science projects for both grade and high school levels can be found in two publications from Facts On File, **Junior Experiments on File**, and **Science Experiments on File**. These books feature step-by-step instructions for experiments in the physical, life and earth sciences.

Biographical reports are a frequent assignment and the Library has many sources of information about notable people, past and present. Some outstanding ones are the **Current Biography** series, the **Hispanic 100**, the **Contemporary Authors** series, and, in the Children's Library, **Who Was Who In World Exploration**, which surveys the lives and contributions of more than 800 explorers.

A good beginning for research on any topic can be found in the periodicals section of the Adult and Children's Libraries. The Children's Library has many quality magazines that students can utilize, including **"Odyssey"** and **"Kids Discover"**. Both use text and photographs for articles about astronomy, geology, history, and ecology.

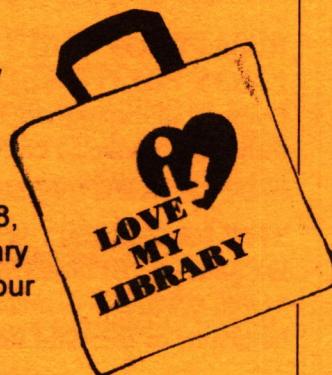

The Pamphlet Files should not be overlooked as a resource; information on government, the countries of the world, and medicine are a few of the subjects included. Both periodicals and pamphlets can be checked out.

Encarta '96, an interactive encyclopedia for all ages, and the **Grolier Multimedia Encyclopedia '96** are available on CD ROM to access over 58,000 articles, pictures, maps and graphs. Call the Audio-Visual Department to reserve time on one of three IBM compatible PC's to complete assignments using any of the several word processing programs available.
